SPARSH AGARWAL

5+ Year Experience as Freelance AI/ML Corporate Trainer

+91 - 8755669773

PROFILE SUMMARY

AI Product Manager with expertise in ML, Deep Learning, and Agentic AI, leveraging Python, TensorFlow, PyTorch, and LangChain to build innovative, real-world solutions.

EDUCATION

B.Tech CSE, specializing in Artificial Intelligence & Machine Learning **July 2016 - May 2020**
GLA University, Mathura

WORK EXPERIENCE

AI Product Manager| Jobaaj **May 2020 – August 2022**

- Orchestrated product strategy at Jobaaj by leveraging user-behavior insights and competitive benchmarking in the Accounting, Finance & Data sectors refined the product roadmap which contributed to a 25% uplift in job-seeker engagement and enabled onboarding of 150+ partner employers.
- Designed and deployed an AI calling agent that reduced spam-flagging rates by ~70% and improved student class attendance reminders by 30%, streamlining customer engagement and retention.
- Engineered an AI-powered lip-sync video generation system that automated video creation, captions, and background customization cutting manual effort by 80% and accelerating video delivery speed by 3x.

AI (Python) & Data Science Trainer | Clevered **June 2022 – Current**

- Taught Python, Al, and Data Science to students from India and overseas through live sessions and hands-on workshops.
- Helped 500+ students understand key concepts using real-world examples, projects, and interactive coding exercises.
- Worked with mentors to simplify complex topics, leading to excellent learner feedback (avg. 4.8/5 rating).
- Supported curriculum development and improved course content, resulting in a 95% course completion rate.

PROJECTS

Title	Description
Face Mask Detection (Deep Learning)	Developed a real-time CNN model with 98.3% accuracy using Tensor-Flow and Keras on a dataset of 10,000+ images. Improved precision (97.1%) and recall (96.8%) through data augmentation and hyper-parameter tuning. Implemented real- time detection for surveillance and healthcare, ensuring instant identification and enhancing public safety compliance.
AI-Driven Workforce Scheduling & Optimization	Developed an AI/ML model using classification techniques like Decision Trees, Random Forest, and Support Vector Machines to automate work force scheduling. Achieved a 25% reduction in scheduling conflicts and a 15% increase in resource efficiency by analyzing employee availability, shift patterns, and historical data. Improved operational efficiency and workforce productivity, ensuring better staff allocation and optimized scheduling for business needs.
Credit Card Customer & Transaction Analytics Dashboard	Created Power-BI dashboards and SQL frameworks for credit card analytics, revealing key insights such as 93% of transactions via Blue & Silver cards and 68%of revenue from Texas, New-York, and California, driving data– backed decisions. Reduced Customer Acquisition Cost (CAC)–Provided insights into CAC distribution(Blue Card: $0.89M, Silver & Gold: $0.06M & $0.02M)

SKILLS

TECHNICAL SKILLS – Machine Learning | Deep Learning | Python | JAVA | Agentic AI (LANG-CHAIN, CREW AI-AGENTS) | GEN-AI | OPEN-AI | Computer Vision | Regression | Classification | Clustering | Time Series Analysis | NLP | Tensorflow | PYTORCH | SCIKIT- LEARN | PANDAS | NUMPY | OPENCV | Hugging Face | LLM | CHROMA-DB | Data Visualization (Power-BI, SEABORN, MATPLOTLIB, EXCEL) | JIRA | Agile & Waterfall Methodology | A/B Testing, KPI Tracking | Market Research | Competitive Analysis | User Research | GTM Strategy

SOFT SKILLS - Analytical, Collaborator, Communicator, Planner, Leader, Cross - Functional Collaboration, Data Analysis, Data Driven Decision making.

CERTIFICATIONS & ACHIEVEMENTS

- Certified in Building Multi-Agent AI Systems By CrewAI.(2025)
- Certified By Career Compiler in JOVAC Internship on Full Stack Web - Development.(2023)
- Certified in Master in Python Libraries for Machine Learning, Data Science and Image Processing.(2022)
- Represented India in Football U17
